

ASEA JOURNAL 1977

VOLUME 50

PUBLISHED BY
ASEA
VÄSTERÅS, SWEDEN

LIST OF AUTHORS

	Page		Page
<i>Andersson, H. & Nilsson, A.</i>		<i>Krecker, W.</i>	
Aluminium foil mill in Spain	57	ASEA introduces unconventional motor series	51
<i>Coltman, R.</i> (see Fridén, L. & Coltman, R.)		<i>Löfgren, A.</i> (see Rødsten, S. & Löfgren, A.)	
<i>Danielsen, L.</i>		<i>Nilsson, A.</i> (see Andersson, H. & Nilsson, A.)	
Position measurement and positioning with the DS-8 system	115	<i>Nilsson, H.</i> (see Henze, M. & Nilsson, H.)	
<i>Erlandsson, G.</i>		<i>Nylund, C.-G.</i>	
New, light, restrike-free oil-minimum circuit-breaker	17	EXCONAL® conductors	127
<i>Ferensztajn, B.</i>		<i>Peterson, B.</i>	
Automatic horizontal coal haulage system in the Staszic Mine, Katowice, Poland	103	Battery and diesel-powered fork-lift trucks	135
<i>Frank, H. & Pettersson, K.</i>		<i>Pettersson, K.</i>	
Raising the production of arc furnaces by stabilising the voltage with thyristor-switched capacitors	9	Electrical equipment for metallurgical converters	3
<i>Fridén, L. & Coltman, R.</i>		<i>Pettersson, K.</i> (see Frank, H. & Pettersson, K.)	
New trams for Melbourne	75	<i>Porteous, T.</i>	
<i>Gunnarsson, L.</i> (see Söderberg, E.A.B. & Gunnarsson, L.)		Light-alloy motors in corrosive environments	64
<i>Häggström, Å.</i> (see Hedvall, P. & Häggström, Å.)		<i>Rødsten, S. & Löfgren, A.</i>	
<i>Hedvall, P. & Häggström, Å.</i>		ASEA marine automation equipment for eight Shell products tankers	85
MAGNADISC®—a new industrial wastewater treatment system for use in the iron and steel industry	141	<i>Scherer, Jr, H.N. & Thorén, B.</i>	
<i>Hellsin, S.</i>		The AEP-ASEA UHV Test Station	99
Soundproofed mobile diesel-generator sets	61	<i>Söderberg, E.A.B. & Gunnarsson, L.</i>	
<i>Henze, M. & Nilsson, H.</i>		Rc4, a further development of ASEA's thyristor-controlled locomotives	27
STRESSOMETER® systems with microcomputer-based electronics	109	<i>Tedesjö, Å.</i>	
<i>Ibstedt, J.-E.</i>		A new generation of PRESSDUCTOR® tensiometers	33
ALSY-8, a modular alarm and measuring system for marine and industrial applications	83	<i>Thorén, B.</i> (see Scherer, Jr, H.N. & Thorén, B.)	
		<i>Wallin, G.</i>	
		Quality control in ASEA's product shop for small contactors	39

LIST OF CONTENTS

	Page		Page
<i>Research and testing</i>			
Light-alloy motors in corrosive environments	64	Amtrak leases ASEA locomotive *	22
Swedish-American UHV Test Station *	67	Danish State Railways order electrical equipment from ASEA for prototype commuter trains *	23
Experimental car uses ASEA motors *	71	Rc4, a further development of ASEA's thyristor-controlled locomotives	27
The AEP-ASEA UHV Test Station	99	Aluminium foil mill in Spain	57
New advance in high-pressure forming presented to the automotive industry *	121	The Skagerrak transmission now in commercial operation *	72
ASEA technology can help to solve the problems associated with nuclear waste *	122	Static excitation system for synchronous machines *	92
		Induction heating of steel tubes at Wirsbo Bruks AB, Sweden *	96
<i>Materials</i>		New high-power thyristors from ASEA *	151
New insulation increases output *	93	New ore locomotives delivered to the Swedish State Railways *	152
New advance in high-pressure forming presented to the automotive industry *	121		
EXCONAL® conductors	127	<i>Electrical, electronic and hydraulic equipment</i>	
<i>Manufacturing</i>		New, light, restrike-free oil-minimum circuit-breaker	17
Quality control in ASEA's product shop for small contractors	39	New generation of ASEA STRESSOMETER® shape-meters *	19
New advance in high-pressure forming presented to the automotive industry *	121	SF ₆ gas-insulated switchgear for 800 kV system voltage *	21
Computer-based production control system for pulp mills *	123	A new generation of PRESSDUCTOR® tensiometers	33
ASEA industrial robots for the automotive industry *	151	Quality control in ASEA's product shop for small contractors	39
<i>Nuclear power</i>		STAL-LAVAL/ASEA marine control system for modified propulsion machinery *	47
Nuclear power training simulator *	20	Aluminium foil mill in Spain	57
ASEA-ATOM/STAL-LAVAL to supply the reactor and turbine plants for Forsmark 3 *	44	Swedish-American UHV Test Station *	67
ASEA-ATOM/STAL-LAVAL to deliver the reactor and turbine plants for Oskarshamn 3 *	69	Revolutionary design for city substation *	70
ASEA technology can help to solve the problems associated with nuclear waste *	122	ASEA to deliver electrical equipment for new pulp mill in Cameroon *	71
ASEA to supply 400 kV SF ₆ switchgear for Ringhals Nuclear Power Station *	149	ALSY-8, a modular alarm and measuring system for marine and industrial applications	83
<i>Turbines</i>		ASEA marine automation equipment for eight Shell products tankers	85
ASEA-ATOM/STAL-LAVAL to supply the reactor and turbine plants for Forsmark 3 *	44	Static excitation system for synchronous machines *	92
Power Pac gas turbines for Egypt *	48	ASEA receives major substation orders from the Middle East *	93
ASEA-ATOM/STAL-LAVAL to deliver the reactor and turbine plants for Oskarshamn 3 *	69	New control system for handling Portland cement *	94
<i>Electrical machines and gears</i>		Load indicator for road vehicles *	95
Electrical equipment for metallurgical converters	3	The AEP-ASEA UHV Test Station	99
"Product of the month" in OEM Design *	19	STRESSOMETER® systems with microcomputer-based electronics	109
Mobile diesel-generator sets for working sites *	23	Position measurement and positioning with the DS-8 system	115
ASEA introduces unconventional motor series	51	Microcomputer-based electronics now used in ASEA's weighing systems *	119
Soundproofed mobile diesel-generator sets	61	ASEA protective relays in the world's oldest A.C. power station *	120
Light-alloy motors in corrosive environments	64	Computer-based production control system for pulp mills *	123
Experimental car uses ASEA motors *	71	EXCONAL® conductors	127
Static excitation system for synchronous machines *	92	ASEA to supply 400 kV SF ₆ switchgear for Ringhals Nuclear Power Station *	149
New insulation increases output *	93	ASEA electronic systems for French printing house *	149
Electric motors with silencers *	121	New transducer for loop regulation *	150
ASEA introduces new series of worm gear speed reducers *	123		
<i>Transformers and capacitors</i>		<i>Computers and process control</i>	
Raising the production of arc furnaces by stabilising the voltage with thyristor-switched capacitors	9	New generation of ASEA STRESSOMETER® shape-meters *	19
Swedish-American UHV Test Station *	67	Nuclear power plant training simulator *	20
Series capacitors for the El Chocón scheme in Argentina *	68	ALSY-8, a modular alarm and measuring system for marine and industrial applications	83
The AEP-ASEA UHV Test Station	99	STRESSOMETER® systems with microcomputer-based electronics	109
Series capacitors in the Puelches Switchyard of the El Chocón scheme in Argentina *	124	Position measurement and positioning with the DS-8 system	115
ASEA delivers world's first three-phase 735 kV transformer *	150	Microcomputer-based electronics now used in ASEA's weighing systems *	119
<i>Semiconductors and static convertors</i>		Computer-based production control system for pulp mills *	123
Electrical equipment for metallurgical converters	3	ASEA electronic systems for French offset printing house *	149
Raising the production of arc furnaces by stabilising the voltage with thyristor-switched capacitors	9		

	Page		Page
<i>Transportation and materials handling</i>		The Skagerrak transmission now in commercial operation *	72
Amtrak leases ASEA locomotives *	22	ASEA receives major substation orders from the Middle East *	93
Swedish State Railways' order for hydraulic retarders *	22	ASEA protective relays in the world's oldest A.C. power station *	120
Danish State Railways order electrical equipment from ASEA for prototype commuter trains *	23	Series capacitors in the Puelches Switchyard of the El Chocón scheme in Argentina *	124
Additional ASEA mine winders to be installed in the LKAB iron-ore mine at Kiruna, Sweden *	23	EXCONAL® conductors	127
Rc4, a further development of ASEA's thyristor-controlled locomotives	27	ASEA to supply 400 kV SF ₆ switchgear for Ringhals Nuclear Power Station *	149
STAL-LAVAL/ASEA marine control system for modified propulsion machinery *	47		
Experimental car uses ASEA motors *	71	<i>Industrial equipment</i>	
New trams for Melbourne	75	New generation of ASEA STRESSOMETER® shape-meters *	19
ALSY-8, a modular alarm and measuring system for marine and industrial applications	83	Large QUINTUS® press delivered to the U.S. aerospace industry *	24
ASEA marine automation equipment for eight Shell products tankers	85	A new generation of PRESSDUCTOR® tensiometers	33
Load indicator for road vehicles *	95	Sugar centrifugals for Spain *	45
Automatic horizontal coal haulage system in the Staszic Mine, Katowice, Poland	103	Norwegian steelworks installs large MAGNADISC® wastewater cleaning system *	46
Microcomputer-based electronics now used in ASEA's weighing systems *	119	ASEA control system and drives for Nylex plant in New Zealand *	47
New advance in high-pressure forming presented to the automotive industry *	121	Aluminium foil mill in Spain	57
Battery and diesel-powered fork-lift trucks	135	ASEA to deliver electrical equipment for new pulp mill in Cameroon *	71
U.S. aerospace industry orders large QUINTUS® presses *	148	ALSY-8, a modular alarm and measuring system for marine and industrial applications	83
ASEA receives record order from the Swedish State Railways *	148	New control system for handling Portland cement *	94
ASEA industrial robots for the automotive industry *	151	STRESSOMETER® systems with microcomputer-based electronics	109
New ore locomotives delivered to the Swedish State Railways *	152	Position measurement and positioning with the DS-8 system	115
		Microcomputer-based electronics now used in ASEA's weighing systems *	119
<i>Furnaces</i>		Computer-based production control system for pulp mills *	123
Electrical equipment for metallurgical converters	3	MAGNADISC®—a new industrial wastewater treatment system for use in the iron and steel industry	141
Raising the production of arc furnaces by stabilising the voltage with thyristor-switched capacitors	9	U.S. aerospace industry orders large QUINTUS® presses *	148
ASEA induction furnaces for Iran *	21	ASEA electronic systems for French offset printing house *	149
ASEA awarded "La Poche d'Or" *	48	New transducer for loop regulation *	150
Induction heating of steel tubes at Wirsbo Bruks AB, Sweden *	96	ASEA industrial robots for the automotive industry *	151
ASEA arc furnaces for new steelworks in the German Democratic Republic *	96		
		<i>Miscellaneous</i>	
<i>Electrical power plants, networks and substations</i>		"Product of the month" in OEM Design *	19
Nuclear power plant training simulator *	20	ASEA awarded "La Poche d'Or" *	48
SF ₆ gas-insulated switchgear for 800 kV system voltage *	21	Reprints from the ASEA Journal *	48
Mobile diesel-generator sets for working sites *	23	Reprints from the ASEA Journal *	124
Soundproofed mobile diesel-generator sets	61	Reprints from the ASEA Journal *	152
Series capacitors for the El Chocón scheme in Argentina *	68		
Revolutionary design for city substation *	70		

* News in brief
